## About the Institute

Priyadarshini Institute of Technology and science, Tenali was established in the year 2007 with sole aim of providing quality higher technical education to rural sector through its dedicated and committed staff. This opportunity made the students to become technologically superior and to serve the nation Attracting the finest students by creating an overall intellectual atmosphere to train and Empower the professionals with global skills assigning their Legitimate place of honor in the society and Our never ending goal in technology continuously challenges the concept of what's possible we are helping the lives of students through education we have been working to bring the resources and solutions needed for advancing education. We help to turn their vision in to reality technology that brings quality education to students. That's our unwavering commitment. To make education as a tool for social change for the betterment of the society. To spread education globally in the field of engineering and management using existing resources and technologies Empowering students to be tomorrow's leaders

## About the Department

If you are looking for a well-balanced and innovative teaching-learning atmosphere in MECHANICAL Engineering, then you are at the right place! The Department of MECHANICAL Engineering strives for excellence in teaching and learning and professional development.

we are proud to have start-of-the-art laboratories and dedicated academic and technical staff to support our academic program. Our department and its experienced staff offer practical related education, preparing our students for a successful and rewarding career. Needless to say that about twenty percent of our students from our last two graduating batches have qualified in GATE for higher studies and its testimony of our academic excellence. Our graduates are exceptionally well prepared for challenging careers, handling major projects and being on the fast track towards new heights in their careers. So why wait? Come and join us now and build the Nation!

## Topics covered

1. Metallic materials- super alloys, Aluminium, Magnesium, Materials for cryogenic application,
2. characteristics & applications of polymers- Elastomers- Processing of plastics.
3. carbon-carbon composites, fiber-reinforced composites and nature-made composites, and applications
4. SHAPE MEMORY ALLOYS: Introduction- shape memory effect- classification
5. NANO MATERIALS: Introduction- properties at nano scales- advantages & disadvantages

Date:01/03/2020

### PROGRAM REPORT

**Name of the event:** A Two-Week certification program on “ADVANCED MATERIALS”

**Date:** 17/02/2020 to 29/02/2020

**Resource person:** Mr. Y.SIVASANKARA RAO ,ASSOCIATE PROFESSOR, Dept of Mech

Contact No: 9030673835

Email ID: siva.cadcam@gmail.com

**Name of the Coordinator:** Mr. V.Anil Kumar, Assistant professor.

Dept. of Mechanical Engineering

**Number of students attended: 116**

**VENUE:** SEMINAR HALL, PRIYADARSHINI INSTITUTE OF TECHNOLOGY & SCIENCE

**PRIYADARSHINI INSTITUTE OF TECHNOLOGY & SCIENCE**, Chintalapudi organized certification program on “ADVANCED MATERIALS” For B.Tech students by the resource person **Y.SIVA SANKARA RAO** With Advanced materials, to gain knowledge about the metals and alloys and their utility in different environments. To acquire knowledge about polymers and ceramics and their applications. To analyze composite materials along with reinforcements and their applications. Totally 116 students were participated on this training program and their completion of the program they were able to understand the following objectives and learning outcomes.

**OBJECTIVES:**

- To gain knowledge about the metals and alloys and their utility in different environments.
- To acquire knowledge about polymers and ceramics and their applications.
- To analyze composite materials along with reinforcements and their applications.
- To understand the basics of shape memory alloys and functionally graded materials.
- To gain knowledge about the nonmaterial and their applications

**LEARNING OUTCOMES:**

- Justify the knowledge about metals and alloys and their utility in different environments.
- Judge about polymers and ceramics and their applications.
- Analyze composite materials along with reinforcements and their applications.
- Utilize shape memory alloys and functionally graded materials for different applications.
- Justify about the nano materials and their applications.

## About the Institute

Priyadarshini Institute of Technology and science, Tenali was established in the year 2007 with sole aim of providing quality higher technical education to rural sector through its dedicated and committed staff. This opportunity made the students to become technologically superior and to serve the nation. Attracting the finest students by creating an overall intellectual atmosphere to train and Empower the professionals with global skills assigning their Legitimate place of honor in the society and Our never ending goal in technology continuously challenges the concept of what's possible we are helping the lives of students through education we have been working to bring the resources and solutions needed for advancing education. We help to turn their vision in to reality technology that brings quality education to students. That's our unwavering commitment. To make education as a tool for social change for the betterment of the society. To spread education globally in the field of engineering and management using existing resources and technologies. Empowering students to be tomorrow's leaders

## About the Department

Electrical and Electronics Engineering deals with the innovation, design, development and industrial applications of electrical and electronics systems, components and devices

There is a wide variety of domains to which it applies. Among the most the well-known fields, just to name a few are, Electrical Power Generation, Transmission and Distribution, Control Systems, Power Systems, Communications, Robotics, Electronics and Nanotechnology.

The Department of Electrical And Electronics Engineering (EEE) Program was started in the year of 2007 with an intake of 60 affiliated to JNTUK and the department has one post graduation course (M. Tech) in Power Systems with an annual intake of 18 affiliated to JNTUK which was started in the year 2013.

The department has well equipped laboratories with standard quality equipments. The department is catering to the needs of the industry by training students to make valuable contribution.

The Department is endeavoring to produce highly trained and capable engineers, who can take up the challenges of the real world.

## Topics covered

1. Arduino and Multisim are both powerful tools that can be used to learn electronics
2. Here's a process I'd suggest you look into in order to get into electronics and Arduino:
3. Learn the basics of electronics: Before diving into Arduino or Multisim
4. it's important to have a solid understanding of the basics of electronics,
5. There are many resources available online, such as tutorials, videos, and textbooks, that can help you to learn these concepts.

## OBJECTIVES: -

1. Multisim has got so many components that we see in our real-time applications meeting all our Analog & Digital circuit needs.
2. This cannot be seen in Proteus since its work is restricted to digital micro-chip design.
3. Proteus helps in simulating and thus analyzing various conditions of a digital device with Micro/Nano design involved.
4. Logisim is simply a toned-down version of Multisim with more emphasis on digital circuit elements and logic design largely discarding or restricting the use of analog elements and design.

## LEARNING OUTCOMES: -

1. Multisim is a powerful software that can be used to design, simulate, and test electronic circuits.
2. It's important to start with basic circuits and then gradually move on to more complex circuits as you become more comfortable with the software.
3. Learn by doing: Practice makes perfect, apply what you learn and build something.
4. The best way to learn electronics is by building and experimenting with different circuit designs.
5. Start with basic circuits and then gradually move on to more complex projects as you become more comfortable with Arduino and Multisim.

## About the Department

The Department of Computer Science and Engineering, established in 2007, is one of the most dynamic departments of Priyadarshini Institute Of Technology and Science. I am really elated to tell that the department stands on the strength of experienced and well qualified faculty who are very dedicated to teaching and also involved in up-gradation of knowledge. Their research experience will help to cultivate the future of our students. With great demand in industry and great placement opportunities, the department stands tall and proud. Our students are not only academically sound and disciplined but they also organize various events through various clubs and societies like III cell, EDC cell and EPC club, TechComm Professional Society, IEI, IETE to showcase their talents under non – technical, technical and cultural forums. Not only at national level, a good amount of international exposure is also offered for students and faculty in various countries like Spain, USA, Belgium, Sharja, Soth-Korea and Sri Lanka. I believe that my team consisting of CSE students, staff and faculty is capable of doing wonders. It has become a symbol for excellent placements which showcases our academic and extracurricular strengths. I invite you to the Computer Science and Engineering Department whether you are looking for an undergraduate or post graduate program. My team is confident that your stint with Priyadarshini Institute Of Technology and Science will definitely make you outshine with a successful and accomplished career.

## About the Institute

Priyadarshini Institute of Technology and science, Tenali was established in the year 2007 with sole aim of providing quality higher technical education to rural sector through its dedicated and committed staff.

This opportunity made the students to become technologically superior and to serve the nation. Attracting the finest students by creating an overall intellectual atmosphere to train and Empower the professionals with global skills assigning their Legitimate place of honor in the society and Our never ending goal in technology continuously challenges the concept of what's possible we are helping the lives of students through education we have been working to bring the resources and solutions needed for advancing education. We help to turn their vision in to reality technology that brings quality education to students. That's our unwavering commitment. To make education as a tool for social change for the betterment of the society. To spread education globally in the field of engineering and management using existing resources and technologies. Empowering students to be tomorrow's leaders

## About the Department

This era of civil engineering technological changes are very fast this changing world needs innovative ideas along with basic skills and knowledge of civil engineering in the passion to change the world in future to see the advanced civilization we need the basic weapons are required priyadarshini collage of engineering providing advanced knowledge in civil engineering and qualified experienced faculties and advanced equipment with well facilities.

Civil engineering is the very basic branch of engineering and said to be the mother of all other engineering branches came up only after it.

Now, it is comprises of different sub-branches such, Structural Engineering, Transportation Engineering, etc.

Civil engineers provide the technical expertise and management skills to plan, design, construct and maintain facilities such as buildings, bridges, road, rail, airports and harbours.

The lab can undertake testing and consultancy works as well. Recently, the department has published papers in journal and conference proceedings

## Topics covered

1. Introduction to the building information modeling
2. 3D modeling design building sample
3. Create floors, doors, roofs, sealing, rooms.
4. Adding rails, rams, create curtain walls
5. Working with reference plans with grid project views

**OBJECTIVES: -**

- Revit is 4D building information modelling application capable with tools to plan and track various stages of the building's lifecycle, from concept to construction and later maintenance and/or demolition
- Revit is used to design, document, visualize, and deliver architecture, engineering, and construction projects
- Analyse and interpret the results using post processor
- Design the structural elements.

**LEARNING OUTCOMES: -**

- Revit enables architects to create accurate and detailed drawings, renderings, and animations of their designs
- Perform analysis
- Revit Architecture also allows architects to collaborate with other
- helping to reduce errors and inconsistencies in the design process

## About the Institute

Priyadarshini Institute of Technology and science, Tenali was established in the year 2007 with sole aim of providing quality higher technical education to rural sector through its dedicated and committed staff.

This opportunity made the students to become technologically superior and to serve the nation. Attracting the finest students by creating an overall intellectual atmosphere to train and Empower the professionals with global skills assigning their Legitimate place of honor in the society and Our never ending goal in technology continuously challenges the concept of what's possible we are helping the lives of students through education we have been working to bring the resources and solutions needed for advancing education. We help to turn their vision in to reality technology that brings quality education to students. That's our unwavering commitment. To make education as a tool for social change for the betterment of the society. To spread education globally in the field of engineering and management using existing resources and technologies Empowering students to be tomorrow's leaders

## About the Department

This area of ECE engineering technological changes are very fast this changing world needs innovative ideas along with basic skills and knowledge of ece engineering in the passion to change the world in future to see the advanced civilization we need the basic weapons are required priyadarshini collage of engineering providing advanced knowledge in ece engineering and qualified experienced faculties and advanced equipment with well facilities.

Ece engineering is the very basic branch of engineering and said to be the mother of all other engineering branches came up only after it.

Now, it is comprises of different sub-branches such, VLSI, Embedded system Communication Engineering, etc. ECE engineers provide the technical expertise and management skills to plan, design, construct and maintain facilities such as communications system

The lab can undertake testing and consultancy works as well. Recently, the department has published papers in journal and conference proceedings

## Topics covered

1. Raster scan and random scan system
2. Video controller and raster scan display processor
3. Image processing system components and applications
4. Sampling and quantization
5. Frequency and spatial domain

**Number of students attended:** 114

**VENUE:** COMMUNICATION LAB, PRIYADARSHINI INSTITUTE OF TECHNOLOGY & SCIENCE

**PRIYADARSHINI INSTITUTE OF TECHNOLOGY & SCIENCE**, Chintalapudi organized certification program on “IMAGE PROCESSING” For B.Tech students by the resource person **K.RAVI KUMAR**. The digital image can be made available in any desired format (improved image, X-Ray, photo negative, etc) It helps to improve images for human interpretation. Information can be processed and extracted from images for machine interpretation. Totally 114 students were participated on this training program and their completion of the program they were able to understand the following objectives and learning outcomes

## **Objectives**

- Digital image, pixels, representation of digital image in spatial domain as well as in matrix form. Block diagram of fundamentals steps in digital image processing,
- Digital Image, Processing systems, Structure of the Human, Image Formation in the Eye, Brightness Adaptation and Discrimination,
- Logic Operations involving binary images, Introduction to Morphological Image Processing, Definition of Fit and Hit, Dilation and Erosion, Opening and Closing
- Discontinuity based techniques, Point Detection, Line Detection, Edge Detection using Gradient and Laplacian Filters, Mexican Hat Filters, Edge Linking and Boundary Detection

## **Learning Outcomes**

- Learns the fundamentals of image processing.
- Explains human visual perception.
- Explains how images are acquired.
- Explains the basic relationships between pixels.
- Applies transformations on images.
- Explains histograms and changes histograms of images
